

BRAINSTORMING

Implement Client Script & UI Policy (Incident) — ServiceNow

1	Make Assignment Group mandatory when Impact is High
2	Make Urgency read-only when Impact is High
3	Automatically set Urgency for High Impact incidents
4	Show an information message when Urgency is auto-set
5	Prevent saving when Assigned To is missing for High Impact incidents
6	Prevent State changes through list editing
7	Allow State changes through the Incident form
8	Use reverse UI Policy behavior when the High Impact condition is false
9	Improve consistency and accuracy of Incident data entry
10	Reduce incorrect submissions and manual checking
11	Support accurate reporting and SLA compliance
12	Maintain better service quality through controlled Incident updates

Brainstorming Focus

The ideas focus on conditional field behavior, automatic updates, validation, controlled editing, and improved Incident data quality.
